

At Hyaline Enviro Engineers, we specialize in managing and delivering turnkey projects within the agreed timelines. By leveraging cutting-edge technology and tools, we ensure the swift and efficient completion of all projects. Our in-house team, composed of highly experienced professionals, is dedicated to delivering excellence.

ABOUT US

Hyaline Enviro Engineers is a leading name in Heavy Engineering and Fabrication, delivering precision-engineered solutions across multiple industries. With over a decade of expertise, we specialize in designing and manufacturing high-quality MS (Mild Steel) & SS (Stainless Steel) structures, as well as piping systems, pressure vessels, firefighting solutions, HVAC ducting, insulation, and more. With a proven track record in projects, we specialize in delivering innovative, cost-effective, and high-performance solutions across diverse industries. By leveraging cutting-edge technology and tools, we ensure the swift and efficient completion of all projects. Our in-house team, composed of highly experienced professionals, is dedicated to delivering excellence.

OUR VISION

" To be a globally respected leader in piping and structural fabrication, delivering innovative, high-quality solutions with an unwavering commitment to safety, sustainability, and client success."

INDUSTRY EXPERTISE

- ❖ Mechanical Piping, Equipment Fabrication & Erection
(Including IBR Steam & Fire Piping Work)
- ❖ Utility and Process Piping Systems
- ❖ IBR Boiler Setup and Certification
- ❖ Fire Hydrant Systems
- ❖ Steam Piping & Boiler Installation
- ❖ Process Piping
- ❖ HVAC
- ❖ Structural Works

OUR FABRICATION CAPABILITIES

Pressure Vessels (MS & SS)

We design and fabricate high-quality pressure vessels for industrial applications, including chemical processing, pharmaceuticals, and wastewater treatment. Our vessels are built to withstand high pressure, ensuring durability and efficiency.

Project Highlights: Designed and installed pressure vessels for a chemical manufacturing unit, ensuring high safety and operational efficiency.

Stainless Steel Racks (Basket Racks)

Our SS basket racks provide durable, corrosion-resistant storage solutions for commercial kitchens, pharmaceutical units, and industrial setups.

Project Highlights: Supplied custom SS racks for a food processing industry, improving storage efficiency and hygiene.

Silo Tanks (MS & SS)

We manufacture silo tanks for bulk material storage, including cement, grains, and liquids. Our tanks are designed for long-term durability and efficiency.

Project Highlights: Supplied large-capacity silo tanks for a water treatment facility.

Oil Storage Tanks (Low-Density & High-Density)

We specialize in fabricating oil storage tanks for petroleum, edible oil, and industrial applications, ensuring leak-proof and high-durability designs.

Project Highlights: Fabricated and installed oil tanks for a lubricant manufacturing company.

Effluent & Sewage Treatment Plant (ETP & STP) Structures

We fabricate custom ETP and STP structures for wastewater treatment, tailored to industry-specific requirements.

Project Highlights: Engineered and fabricated complete structural frameworks for multiple wastewater treatment facilities, ensuring durability and efficiency.

Reactor & Jacketed Tanks (SS & MS)

Our reactor tanks are designed to withstand high pressure and temperature variations, making them ideal for chemical and pharmaceutical industries. Additionally, we offer jacketed tanks for controlled heating and cooling, widely used in food processing and chemical industries.

Project Highlights: Supplied SS reactor tanks for a pharmaceutical company and installed a jacketed tank system for a dairy production unit.

Pre-Engineered Building (PEB) Structures

We design and fabricate PEB structures for warehouses, industrial sheds, and commercial buildings, ensuring lightweight yet durable construction.

Project Highlights: Constructed a PEB warehouse for a logistics company.

Solar Mounting Structures

We manufacture solar panel mounting structures for ground-mounted and rooftop installations, ensuring high durability and stability.

Project Highlights: Designed and supplied robust solar mounting structures for large-scale renewable energy projects, ensuring optimal efficiency and durability.

Gas Piping Fabrication (LPG & Natural Gas)

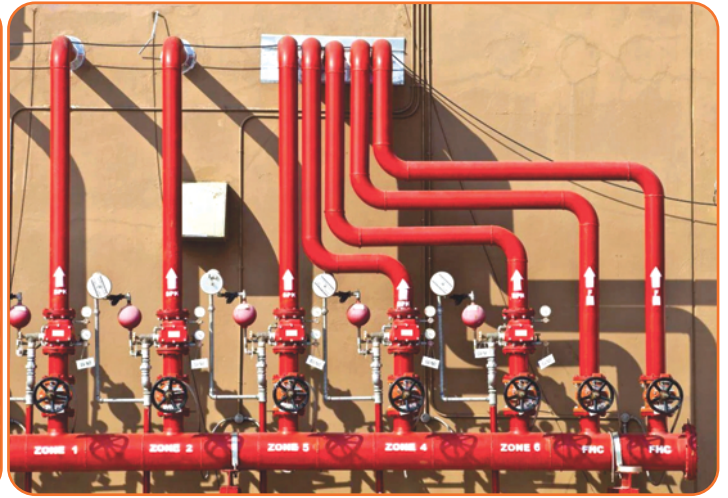

We provide industrial-grade gas piping solutions for LPG and natural gas systems, ensuring safety and compliance with regulations.

Project Highlights: Completed a gas pipeline installation for a large-scale manufacturing plant

Firefighting & Fire Hydrant Systems

Fabrication and installation of fire safety systems, including fire hydrants, sprinklers, and piping networks for industrial and commercial buildings.

Project Highlights: Delivered a complete firefighting system with hydrants, sprinklers, and suppression solutions for industrial and commercial safety.

Air Receiver Tanks (MS)

We manufacture air receiver tanks to store compressed air and regulate system pressure for various industrial applications.

Project Highlights: Delivered Air receiver tanks for a textile manufacturing unit.

Structural Steel Fabrication

We specialize in custom structural steel fabrication for industrial and commercial applications, including.

Project Highlights: Engineered custom structural steel frameworks for an industrial expansion project.

Construction of Civil & Infrastructure Solutions

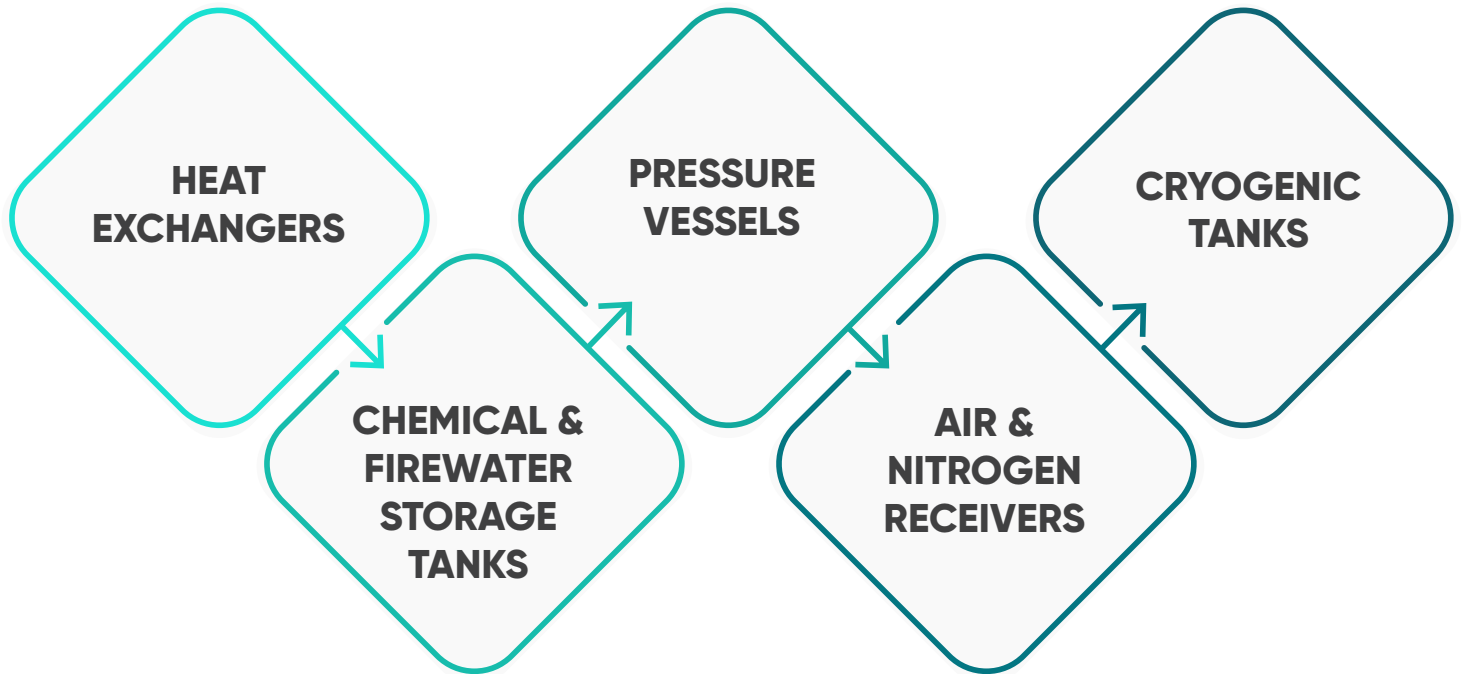

Hyaline Enviro Engineers offers end-to-end solutions in civil construction, structural steel fabrication, and infrastructure development. Our expertise covers the construction of industrial and commercial buildings, water and wastewater treatment plants (WTP, STP, ETP), modular operating rooms, and advanced flooring solutions like conductive and PVD flooring.

Project Highlights: We handle complete project execution—from structural work and RCC foundations to turnkey delivery—ensuring quality, compliance, and timely completion across all sectors.

Process Equipment Fabrication

Our expertise extends to custom process equipment, including:

Project Highlights: Fabricated high-precision heat exchangers and chemical storage tanks for a large industrial facility.

WHAT DEFINES US

- ❖ Successfully completed over 100+ EPC projects.
- ❖ A strong team of 40+ experienced professionals and 250+ tradespeople.
- ❖ Extensive experience in the pharmaceutical, cement, food, fertilizer, manufacturing, commercial high-rise, and petrochemical sectors.
- ❖ Expertise in design, engineering, structural, piping, insulation, and fire protection systems.
- ❖ We have established strong relationships with our clients, with most returning to us for future projects due to our commitment to quality and reliability.
- ❖ Successfully executed projects in Telangana, Andhra Pradesh, Karnataka, Maharashtra, Madhya Pradesh, and Uttar Pradesh.

INDUSTRIES WE SERVE

Oil & Gas & Petrochemical	High-pressure piping, storage tanks, process skids, and structural components.
Pharmaceutical & Chemical Processing	SS fabrication, process vessels, cleanroom ducting, and pipelines
Power & Energy	Boilers, turbines, ducting, heat exchangers, and transmission structures.
Water & Wastewater Treatment	Pressure vessels, clarifiers, filters, and effluent treatment plant fabrication.
Food Processing & Agro	Stainless steel tanks, conveyors, processing equipment, and safety structures
Cement & Heavy Manufacturing	Kiln shells, steel structures, conveyors, and dust collectors.
Infrastructure & High-Rise Buildings	Structural steel fabrication, skywalks, bridges, and facade engineering.

AN ISO 9001 : 2008 Certified Company
